- *Other languages and frameworks:* Java (desktop and Android), Objective-C (iOS)

work experience

Brand Networks

June 2013 - present

Rochester, NY

Software Engineer specializing in front-end Web development. Working on a team in an “agile” environment with designers, other engineers, and directly with customers. Past: built exciting and modern custom Web marketing solutions for clients. Present: designing and implementing internal products to make daily activities of Content Services team members more efficient and effective.

Wegmans Food Markets

December 2011 - May 2012

Rochester, NY

Programmer Analyst (co-op internship). Spent approx. 50% of my time performing code maintenance (bug fixes/feature requests) for enterprise ASP.NET applications, and the other 50% doing R&D. Built a prototype Chrome extension from scratch to integrate with the company's online shopping list and later ported the extension to Firefox.

iD Tech Camps

Summers of 2010, 2011, 2012

Princeton, NJ

Instructor, Lead Instructor. Responsibilities included teaching a course of up to 8 students per week, all-day supervision of campers, greeting family members during check-in & check-out, and communicating to parents the progress of their children during the week. Taught classes in Java, game modding, and game design.

RIT ITS Resnet

April 2011 - May 2013

Rochester, NY

Computer repair technician. Provided technical support via phone, assisted customers at front desk, diagnosed and troubleshoot hardware and software issues, removed malware from infected machines, maintained in-house ticketing system (PHP, MySQL, HTML, CSS, JavaScript/JQuery).

other activities

- Regular participant in BarCamp Rochester “un-conference” events.
- Participant in Coderetreat event focused on test-driven development and the fundamentals of software development
